

Healthcare Management

Preparing you for careers in the health care industry.

Within the Health Science program at McPherson College, a major in Healthcare Management prepares students for a career in planning, directing, or coordinating medical and health services in hospitals, clinics, managed care organizations, public health agencies, or similar organizations.

Our innovative, multi-dimensional approach starts with a curriculum designed to cultivate an understanding of essential healthcare knowledge and is tailored to the profession you wish to pursue. Experiential learning, internships, and job shadowing offer exposure to the healthcare field throughout the duration of your study. Through these opportunities to explore, experience, and engage in all facets associated with the healthcare industry you'll be prepared to start your career and/or be ready for graduate school.

EXPERIENCE

Built on a foundation of experiential learning, students have opportunities to be exposed to the vast industry of healthcare through exploration, professional job shadowing opportunities, internships, and capstone projects built right into the curriculum:

HS 275 - Career Exploration - You'll be exposed to a broad range of potential careers in the healthcare system allowing you to hone your future career interests.

HS 375 - Engage in a focused practicum with an experienced professional based on your interests while developing and solidifying your senior capstone experience.

HS 475 - Capstone experience - Design a project based on your goals and how you best see your career developing. Capstones may include internships, undergraduate research, additional upper-level course work, and work toward professional certification(s).

STUDENT PROFILE

Kelly Hoffman

Major: Healthcare Management

Hometown: Standing Stone, Pennsylvania

"The opportunity to experience different areas in healthcare during my classes is what I am really looking forward to. I believe being able to experience first-hand various career opportunities will allow me to apply for internships to gain more experience, thereby making me more employable." Hoffman, who is a Health Science Scholar, recently participated in her first outreach with Disability Supports of the Great Plains and was involved in developing a program for employee training.
